SUMMARY

Software Developer specializing in **Backend Development** using **Java (Spring Boot)** and **Python (FastAPI)**. Experienced in designing **Scalable REST APIs**, implementing **Authentication & Authorization**, optimizing **MySQL Databases**, and building **Production-Ready Applications**. Currently delivering **End-to-End Backend Solutions** in a fast-paced startup environment.

EXPERIENCE

Asuni Technologies | Software Developer Feb 2026 – Present | Remote

- Leading backend development for core modules using **Java (Spring Boot)** in a **modular monolithic architecture**.
- Owning end-to-end delivery: **requirement analysis → design → development → deployment** for multiple features.
- Coordinating with development team and stakeholders to align technical implementation with business needs.
- Leveraged AI coding assistants to accelerate development while maintaining rigorous code review and architectural standards.

Dating Application | Java, Spring Boot, WebSocket, MySQL, JPA/Hibernate, JWT

- Built a real-time dating platform featuring instant messaging, voice calling, video calling, and user matchmaking.
- Implemented WebSocket/STOMP-based communication supporting message delivery, read receipts, and presence tracking.
- Integrated WebRTC for peer-to-peer voice and video communication with low-latency media streaming.
- Developed secure REST APIs using Spring Boot, JWT authentication, and MySQL-backed user management services.

MyShop – Multi-Vendor Marketplace | Java, Spring Boot, MySQL, JPA/Hibernate, JWT

- Built a multi-vendor marketplace supporting Admin, Seller, and Customer roles with secure access controls.
- Implemented JWT authentication, email OTP verification, seller onboarding workflows, and role-based access control.
- Developed inventory management, shopping cart, product catalog, and seller product ownership services.
- Designed scalable REST APIs using Spring Boot, JPA/Hibernate, and MySQL with clean architecture principles.

NovaHRX – Enterprise HRMS | Python, FastAPI, MySQL, Pydantic, SQLAlchemy

- Developed a multi-tenant HRMS platform for employee onboarding, attendance, leave, and payroll management.
- Implemented JWT authentication, email OTP verification, RBAC permissions, and secure session management.
- Integrated Firebase FCM notifications and Cloudflare R2 cloud storage for employee communication workflows.
- Designed scalable REST APIs using FastAPI, SQLAlchemy, and MySQL for HR workflow automation.

WebSeeder Technologies | Software Developer Intern Jun 2025 – Sep 2025 | Indore, MP

- Developed backend APIs using FastAPI, and Flask for automation, data processing, and ML-powered applications.
- Integrated MetaTrader5 for live market data ingestion and automated trade execution workflows.
- Optimized application performance and backend workflows following SDLC best practices.

Automated Trading Platform | Python, FastAPI, MySQL, Pydantic

- Built FastAPI-based backend for automated trade execution, custom strategy management, account handling.
- Integrated MetaTrader5 for real-time market data processing and live order execution with strategy-driven automation.
- Implemented backtesting engine on historical market data, achieving **25–30% improved returns** over baseline strategies.
- Designed modular, clean-architecture FastAPI backend with MySQL-backed analytics and efficient request handling.

SKILLS

Languages: Java, Python, SQL | **Databases:** MySQL, Oracle | **Frameworks:** FastAPI, Spring Boot, Hibernate, Pydantic

Frontend: HTML, CSS, JavaScript | **Tools:** Git, GitHub, Maven, Docker, Postman, Firebase FCM, Cloudflare R2

Core Concepts: REST APIs, OOP, SDLC, Modular Architecture, Microservices, Agile, CI/CD, Swagger, AI-Assisted Development

EDUCATION

Institute of Engineering And Science, Indore Jul 2022 – Apr 2026

B.Tech., AIML (Minor in Computer Science and Engineering) (SGPA: 8.65/10)

Indore, MP

CERTIFICATES

Oracle - Cloud Database Services 2025 Certified Professional	Sep 2025
Postman - Postman Api Fundamentals Student Expert	Oct 2025
Scaler Topics - Java Course - Mastering the Fundamentals	Jan 2026
Kaggle – Advance SQL	Nov 2025
